## PROJECTS

### Flavorwiki.com (Mern)(Next js) (10/2021 - Present)

- I is online survey taking webapp , where a person can take survey about a product and add review about the product.
- My Job is to develop new feature and bug fixes recommended by the client

### Attendance Management System (React Js)

- It is a Attendance management app for any company that has staff and it needs to manage their Attendance, Sales, campaigns, Trackings and salary according to their performance. My role was in this project is to design UI and reusable components.
- React, Redux, Laravel

### Music in A Dark Age (webpage)

- It was a blog page to make people aware of how music helps people reduce metals stress during pandemics and lockdowns. It was a research-based Project which includes interviews of some musicians and has surveys results included. My role in this project was to design the whole website and add animation throughout the project.
- HTML, CSS, Bootstrap, Javascript and Lottie animation

### Property Management System (Laravel)

- It is a Property management system that was already made in core PHP. my role is to change the whole UI of the Project.
- HTML, CSS, Boostarp
